

FOR THE SPECIALIST IN YOU

Mobile business excellence for field professionals who face the toughest challenges

You work best when you can fully focus on the task. That's why Panasonic's Toughbook range is designed to work anywhere. Anytime. In the harshest, most challenging environments. In the wet, the ice and the cold. In the dust, the dirt and the heat.

Because these are the conditions Toughbook was built for.

It's also why RAMM Software has chosen the Panasonic Toughbook range as the preferred hardware for users in the field.

The Tough Difference: built to work wherever you do

Drop & Shock

Mag alloy chassis protects against drops from 1.2 to 3 metres, dependent on model. Shock mounted SSD/HDD and LCD, toughened glass.

Superior Battery Performance

User replaceable batteries with up to 16 hours on a standard battery, dependent on model. Options for extended run time batteries.

Sunlight

Anti-reflective, super bright contrast making the screen easy to view even in sunlight.

Dust

Dust, sand and other airborne particles will not get in the device and damage components.

Rain & Humidity

Humidity and water resistant. Full water immersion, dependent on model.

Temperature

Built to withstand temperatures of -20C to +50C.

Vibration

Built to endure and absorb extensive vibration from vehicle and on-road use.

Connectivity

4G LTE Mobile Broadband (700MHz Band 28 support), with integrated GPS and Dual High-Gain Antenna Pass Through, dependent on model. Dedicated 72-Channel GPS available on FZ-G1 mk4.
